scheme

To help schools experience the Open English Learning Platform and its classroom potential, we have extended our pilot scheme into the first term of the upcoming September 2026 academic year. This initiative follows a year of proven success in empowering teachers and engaging students. Our pilot features specially curated units and customized functional tools designed with the flexibility to be tailored precisely to your teachers' classroom needs. Don't miss the opportunity to bring innovation to your classroom - be part of shaping the future of English learning!

Pilot Mode and Period

Teachers can deliver lessons through the platform in school, or students may use the platform at home. The pilot period is about a one-week lesson during September to December 2026. Schools can determine their preferred schedule within this timeframe.
